

Keeler Exchange Program

REFERENCE KEELER CAPA 1096

Keeler has established a discounted exchange program for the power supply unit marked:

EP29-32777 – MADE IN TAIWAN

This is a UK only exchange program. Please contact your local Keeler distributor if you need to order this unit outside of the United Kingdom.

These plug-in power supplies were in production between 2001 and 2006. Keeler will provide a one-for-one replacement if you feel you need to replace your unit after checking your unit and consulting the relevant field safety notice. Given the long (9+ years) length of service from your existing power unit and the 3 year new warranty carried by the replacement, we are setting the price for this exchange program at £45 each. This price excludes VAT and is conditional on you returning your existing power unit to Keeler. The discounted £45 price includes postage and also includes a pre-paid package for the return of your existing power supply.

Please contact Keeler via one of the routes below, providing your details and the number of units you intend to replace.

Email: replacement@keeler.co.uk
